

INTRODUCTION

Beer is one of the oldest beverages produced by mankind dating as far back as over 7000 years with traces of beer stone (a by-product of the brewing process) found on ancient pottery in what is today Iran. It spread throughout all corners of the world and developed into a huge global industry. Beer is essentially a very simple product, made up of a combination of water, malt, hops and yeast. However, variations in the ingredients and in the brewing process itself result in a huge variety of extremely different types of beer.

Beer can be divided into two main sub-divisions: **Ales** and **Lagers**.

Ales are brewed with a top fermenting yeast which thrives at higher room temperatures (15°C-25°C). This type of yeast and fermentation temperature tend to give ales a fruitier and spicier taste than lagers. In general ales are more robust and complex. Styles of ales include pale ale, India pale ale, amber ale, brown ale, blond ale, cream ale, porters, stout, American pale ale, barley wine, scotch ale, burton ale, old ale, mild ale and Belgian ale.

Lagers by contrast are made with bottom fermenting yeast that works best at cooler temperatures (1°C-12°C). Fermentation happens more slowly and the beer is more stable, so it can be stored or "lagered" for longer than ales, hence the name lager. The yeast tends to have less presence in the finished beer. Lagers have a cleaner, crispier quality with emphasis on the hop and malt flavours. The lager family can be sub-divided into Pale Lager, Dark Lager and Vienna Lager. Pale Lagers include pilsner, helles, märzen, bock. Dark Lagers include dunkles, doppel bock, schwarzbier etc. Vienna Lager is a reddish brown or copper colored beer with medium body and slight malt sweetness with a toasted character. Funnily enough, Vienna Lagers have been, up to now at least, generally uncommon in Europe. They are however very popular in the US and because it was so popular before of the introduction of prohibition in 1919, it is commonly refer to as the "pre-prohibition" lager. The massive range of beer styles and tastes available ensure there is something for everybody. **Sláinte!**
